

Jason Lin - Senior Software Engineer

Email: amigo_brian@hotmail.com LinkedIn: <https://www.linkedin.com/in/jasonlin666/> Github: <https://github.com/Jadson666>

Profile

Hello, I have 10 years engineer experiences, which include 7+ years frontend and 5+ years backend & DB, 6 years C, 7 years JavaScript and 2 years Java. I focus on web apps including blockchain, e-commercial, payment and financial system.

Education

National Taiwan Normal University

Computer Science & Information Engineer

Bachelor's degree (2008/09 – 2013/07)

Skill Set

Web Tech

ReactJS ★
Vue.js
JavaScript ★
Next.js
AngularJs

Tailwind CSS

Style Components

Blockchain (Web3)

Ethers.js
Smart Contract
Metamask

Backend

C/C++ ★
Java
Node.js
Spring MVC
SQL/RDBMS

Cloud Tech

AWS ★
GCP

Soft Skill

Agile
0-1 Team Building

Certification

May.2013 DELF A2 (**French**)
Mar.2014 TOEIC - 905/990 (**English**)
Nov.2016 Oracle SE 8 Programmer (**Java**)
Jul.2018 AWS Certified Developer (**AWS**)

Language Set

★★★★★ Chinese (Native Speaker)
★★★★☆ English (Professional TOEIC: 905/990)

Experience

 **TSMC - Senior Software Engineer** 2025/06 – present | React.js, Java

- Designed and implemented automation strategies for wafer transportation between semiconductor equipment, optimizing process flow and reducing manual intervention.
- Developed an intuitive operator UI for handling wafer status tracing and manual intervention scenarios, significantly enhancing situational awareness and operational efficiency on the production line.

 **Binance - Senior Frontend Engineer (Web3/Web2)** 2022/06 – 2025/3 | React.js, Vue.js, Next.js
[Payment team] As core senior developer, my main responsibility involved in at least following topics:

- Issue new cryptocurrency, sell/buy token on platform, monitor the transaction, KYC the users
- Integrate trading flow between fiat (bank) and cryptocurrency including mint/burn/transfer
- Achieve blockchain interaction between smart contract, Defi wallet and UI
- Building mobile/desktop frontend apps with server/client rendering frameworks, ex. Vue.js, React.js

Achievements:

- Release 2 Ethereum tokens (including FDUSD - top 5 market cap, over 2 billion USD, in the world)
- Delivering credit card in Mexico, the products platform serves with over 1+ million users.
- In charge of upgrading rendering frameworks in multiple projects, at least 20% faster than before.
- Lead the development of 6 start-up applications.

Shopline - Senior Software Engineer 2021/07 – 2022/06 | React.js, AngularJs, Ruby on Rails

As a Full-stack Engineer

- My main responsibility is to deliver the quality of e-commercial platform "Shopline"
- Developed core e-commerce features for SHOPLINE's flagship platform, enabling merchants across five countries to set up online stores and process payments and advertising solutions. practical techs including AngularJs, React.js, Ruby on Rails, redux, etc.
- Refactor legacy AngularJs project to React.js, leverage mono-repo and micro-frontend

Achievements:

- Shopline is a successful application for 8 years but also has great amount of legacy code, I refactoring the code structure which increase 20% maintainability at least.
- Improve the workflow by at least 3 scripting automation, which speed up workflow at least 15%.

Innova Solutions - Software Engineer 2017/03 – 2021/02 | React.js, Java, Next.js, Nest.js, Node.js

As a Software Engineer, I have the following point can provider my company with:

- Strong and hands-on at ReactJS, including JavaScript, HTML, and CSS experience, background with focus on designing and developing SPA using design patterns like Render Prop, HOC, etc.
- Strong and hands-on at Java background with focus on developing Spring-based web
- Strong and hands-on at ReactJS background with focus on designing and developing SPA using design patterns like Render Prop, Higher-order component, Function as children, etc.
- Has knowledge of Oracle/MySQL database, including PL/SQL script
- Experience in utilizing cloud tech like AWS environment (ECS/EC2/CloudWatch) to speed up 300% up deployment efficiency
- Provided technical mentorship to and continuous improvement plan to junior engineers

Achievements:

- Designed and developed two startup project - User portal and Credit Card enrollment applications using Redux, CRA
- Complete integrating online payment services like apple pay, credit card in online payment system which expect has 20k+ user
- Dedicated to training junior ReactJS/Front-end developer, and make them independent and proficient
- Take over very big legacy systems from India team and re-factor the software structure
- Build up a new team including the new management structure, Git flow, and several SOP

Auchan Retail - Software Engineer 2015/07 – 2017/02

| Java, C/C++, PL/SQL

- Database developer with over 20 distributed databases
- Strong experience in developing national-level ERP system
- practical techs include PL/SQL, Pro C, Java, Linux system, etc.

Achievements:

- Technical leading a brand-new ordering system to improve 300% efficiency in daily routine
- Technical leading developing automation tools to improve the efficiency (boost 300% at least), like Cross System Monitor Script, Automated Promotion Data Upload Tool...etc.
- Design new system to replace a ERP system which has over 20k+ user.

Creation

Tutorial: I authored totally 10 hours of free online course. (frontend web design)
